E-mobility

Nr. 1
in the sale of E-motorcycles
in the Czech Republic

Bicycles • Quads • Scooters • Motorcycles • Senior vehicles

- **Ecological:** Electromobility is environmentally friendly. Electric vehicles do not produce emissions and help reduce air pollution.
- **Effective :** Electric powertrains are more energy efficient and cheaper to operate than vehicles with traditional combustion engines.
- **Modern:** Electromobility brings modern and innovative technologies.

Electromobility is not only an ecological choice, but also a modern way to get from point A to point B. In our offer you will find top-quality electric quads, scooters and motorcycles, electric bicycles and electric scooters that allow you to travel without polluting the environment. Explore our wide range of electromobility and find the right vehicle for your needs.

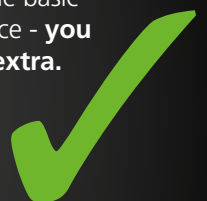

Battery and charger always included

All our bicycles, quads and scooters always have a battery and charger in the basic package and included in the price - **you don't have to buy anything extra.**

Charging from a regular 230 V socket

With us you don't have to worry about the road.

Certain scooters and quads have valid road homologation, so you can register them and drive them without any worries with a valid license plate.

Modern and eco-friendly for work and leisure...

WHEREVER
YOU GO

ATVS

GO THE WAY
YOU WANT

- Versatile use
- Easy handling
- Reliable operation
- Low operating costs
- Great capabilities

15

models for both work and fun

HECHT ATVs combine quiet operation, modern design, fun and heavy-duty work capabilities. Ideal for road use, recreational off-road riding and use on private properties. The range includes models for both children and adults, including large work machines.

Homologated electric quad bikes

INCLUDING SUPPORTS

Quad bikes with homologation

Battery-powered ATVs homologated for road use on public roads - after purchase, you only need to arrange mandatory insurance, register the ATV as usual, attach the license plates, **and you can hit the road.**

Thanks to their excellent terrain permeability and the ability to drive on roads, they are invaluable helpers, for example, at remote cottages and cabins when going shopping. They easily move on unpaved roads and can pass through places where a car has no chance. They do not require a large garage for parking. They serve equally well as a source of adrenaline entertainment, a work machine, and a means of transportation.

Additionally, **they are quiet** and completely emission-free, so they do not disturb neighbors or the surrounding nature. They are also great helpers for livestock.

* The maximum range is influenced by the terrain profile, rider's weight, level of assistance used, and weather conditions.

The scooter is factory-equipped with a speed limiter, which restricts its maximum design speed to 25 km/h to meet the conditions for its operation on public roads. If the speed limiter is disabled, the scooter is considered a motor vehicle unfit for operation on public roads, and its operator is responsible for ensuring it is used exclusively off public roads and that the speed limiter is reactivated before using it on public roads.

HECHT Buggies

Buggies have a solid steel frame and are equipped with safety belts.

Thanks to the low center of gravity, they are more stable and safer than traditional ATVs.
